AGILITY[®] Redefining ELISA.

a-gil-i-ty /ə-'jil-ə-tē/ n.: 1. the ability to respond, instantly and with great efficiency, to fluctuating conditions 2. flexibility, coordination and ease of movement
 3. ingeniously easy, fully automated open ELISA processing

AGILITY®

free-dom /'frē-dəm/ n.: **1.** the quality of being unburdened by limits **2.** a state of empowerment in one's ability to make decisions and act upon them

Redefining Automation

The DYNEX Agility[®] utilizes the proven versatility of ELISA's core technology in a powerful, fully automated platform, for true ELISA optimization. State-of-the-art robotic processing delivers unparalleled precision while eliminating nearly all manual steps, so Agility[®] is efficient and reliable – freeing you and your staff to be as productive as possible, while significantly reducing your cost per test.

- Full, walkaway processing from the beginning of testing
- Up to 16 SmartKit[®] carriers stored on-board for simultaneous runs
- Flexible throughput allows up to 12 plates on-board at once
- Utilizes three precision robotic arms one for sample pipetting, one for reagent pipetting and another for transporting plates and consumables, to obtain maximum process efficiency

Redefining Ease-of-Use

With an intelligent design that emphasizes simplicity, Agility® provides an extremely intuitive, easy-to-use interface. And with continuous sample loading, workflow is streamlined for maximum efficiency and productivity.

- Eliminates most of ELISA's labor-intensive, front-end setup
- Reduces hands-on time by two-thirds of typical open systems
- Barcoding eliminates manual data input
- Assesses testing requirements and develops an efficient work list •
- Comprehensive LIMS integration •
- Continuous sample loading allows operators to begin loading and running microplates as they are ready, instead of all at once

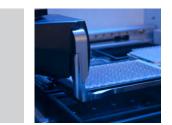

Redefining Reagent Loading

Agility[®] requires the least hands-on time in its category. In part, this advantage is made possible by utilizing the SmartKit[®] packaging format, an innovative new direct-load solution to front-end ELISA kit preparation. SmartKits® are a packaging enhancement, allowing everything to be loaded onto the system at the same time, in one easy step. All consumables for each assay are either loaded into a SmartKit[®] carrier by the end-user or prepackaged in SmartKit® format when purchased from our growing list of major reagent partners.

- Frees up significant labor time and allows for multitasking •
- 2D barcodes printed on kits provide accurate and secure information
- Inventory tracking allows for maximum materials efficiency •
- Consumables are stored on-board, including up to 16 SmartKits[®]

- Eliminates nearly all manual liquid-transfer steps
- Illuminated, color-coded access positions allow simple loading of all kits, tips, microplates and other consumable items, preventing loading errors

Redefining Hands-On Time

Agility's® streamlined front-end preparation minimizes hands-on reagent loading versus traditional open systems, significantly reducing overall assay times. Walkaway, right away.

Redefining Productivity

The intuitive design of the Agility[®] minimizes the potential for human error and greatly reduces the need for on-the-job training. The user interface enables effortless navigation, and the system supports several major error-proofing advances, including a comprehensive monitoring system to measure consumable levels and extensive barcoding to eliminate manual data entry.

Redefining Intelligence

reports waste, washer fluid and clean fluid levels with easy-to-understand, quantitative graphics.

Dashboard

On a crystal clear touchscreen, the Agility[®] dashboard is extremely easy-to-read, follow and understand. Intuitive graphics provide a full overview of every aspect of operation, from the number of tests scheduled to the amount of room remaining in waste containers.

Threshold Results

Threshold results allow programmable quality control equations based on arithmetic, statistical or Boolean calculations.

AGILITY®

in-ge-nu-i-ty /in-juh-noo-i-tee/ n.: 1. skill or cleverness in design 2. the ability to devise tools to best meet one's needs or desires

About DYNEX Technologies

The DYNEX product line, including the DSX[®] and DS2[®] instrument systems, has a proven track record of quality, innovation and reliability as a worldwide leader in fully automated systems and consumables.

DYNEX Agility[®] Specifications

Dimensions	Metric	Non Metric
Width:	<1250 mm	50″
Depth:	<900 mm	36″
Height:	<1230 mm	49″
Footprint:	<1200 x 650 mm	48″ x 26″
Bench Weight:	213 kg (max.)	469 lbs (max.)
Ship Weight:	296 kg (max.)	650 lbs (max.)
Noise:	Noise output <80 dB	

Power Requirements Voltage: Frequency: Power Consumption:

100 – 240V automatic switching 50/60 Hz Typically 400 VA (online UPS required)

Reader Specifications

Photometric Range: Spectral Range: Precision: Accuracy: Read Time:

0.000 to 3.500 OD 405 nm to 690 nm ±0.010 OD at 0.000 to 0.500 OD <1% CV at 0.501 to 2.000 OD <1.5% CV at 2.001 to 2.500 OD ±0.01 or 2.5% (0.000 to 3.000 OD) whichever is greater < 30 seconds, single wavelength <50 seconds, dual wavelength

Washer Specifications

Manifold Configuration: Programmable Volumes: Wash Containers:	8-way wash head 50-999 μl 4 wash bottles at 3.0 L, with quantitative level sensing
Clean Container:	1 wash bottle at 3.0 L, with quantitative level sensing
Waste Container:	10 L with quantitative level sensing
Residual Wash Volume:	<3 µl per well with dual-axis sweep in a flat bottom well
Dispense Precision:	${\leq}5\%$ CV (with 300 μl in a 96 well plate)

Incubator Specifications

Number of Incubators: Temperature Range:	12 (6 Ambient / 6 Elevated) RT + 4° C to 45° C (Elevated Incubator)
Temperature Accuracy:	$RT + 4^{\circ}C$ (Ambient Incubator) + 1°C
Shaking:	14 Hz periodic or continuous

System Specifications

Number of Plates: Number of Sample Tubes: Number of Reagents:

12 (additional continuous load capability) 200 (additional continuous load capability) Up to 16 different SmartKit™ Reagent Packs simultaneously (additional packs can be added using continuous load capability) 2 (sample + reagent)

Number of Pipettes:

Sample Pipetting Specifications

Sample Tip Size: Sample Pipetting Volume: Time to Dispense:

Sample Pipetting Precision: Sample Pipetting Accuracy: Dilution Range:

Number of Sample Tips:

Sample Tube Dimensions:

300 µl 10-300 μl 11 minutes (typical) 50 µl of 96 samples to plate from sample tubes or deep well plates \leq 3% CV (at any operating volume above 10 µl) \pm 2% of target volume 1 part in 199 one-stage dilution, 1 part in 39,601 two-stage dilution 20 racks of 112 tips (additional racks can be added using continuous load capability) 10-17 mm diameter external dimension, 45-100 mm depth

Reagent Pipetting Specifications

Reagent Tip Size:	1200 μl
Reagent Pipetting Volume:	20-1200 μl
Number of Reagent Tips:	1 rack of 98 tips (additional racks can be added using continuous load capability)
Reagent Pipetting Precision:	≤3% CV at 10 shots at any volume in operating range
Reagent Pipetting Accuracy:	$\pm 2\%$ of target volume (single shot mode)

Regulatory Compliance

Electromagnetic Perturbation:	EMC Directive 2004/108/EC: EN 61326-2-6:2006, IEC 61326-1:2006
Electrical Safety:	BS EN 61010-1:2001, IEC 61010-1:2001, IEC 61010-2-101, ETL marked
Lead-free:	All components are RoHS compliant
IVDD:	CE marked per IVD 98/79/EC Directive
